A New 9-11 Matrix,
Learning the Value of Snooping

Recently I decided to look at some simplistic 9-11 Bible code matrixes by others to see if they were statistically significant and how easily they could be further developed. I think that this approach has merit in that it shows how strong the evidence is for the Bible code (if one can easily develop a previous simplistic matrix to a more advanced state), and to show the reader the real value of the methodology of "snooping" terms. This article shows the development of one of those matrixes.

The above photo shows the twin towers in New York City long before September 11, 2001. As you can see they stood out from the surrounding buildings, making an easy target for the terrorists to pick out from all the surrounding skyscrapers.

The matrix below was developed shortly after 9-11 by Art Levitt who appeared on the two recent History Channel TV specials on the Bible code, along with the author. In no way am I criticizing Art's work, but will show in this article how easily it can be further developed. Also, you'll see that what started out as a simple matrix, becomes an extremely significant matrix.

מגדלי התאומים: בין לאדן רוצח אלפי איש   3805

(matrix of Hebrew letters with highlighted terms: **The Twin**, **terror attack**, **Towers**, **bin Laden**, **murders**, **thousands of people**)

Notice how Art Levitt looked for a number of relevant and descriptive terms to initially find the matrix. That's the traditional method of initially finding a good matrix. With the #1 ranked CodeFinder: Millennium Edition program, one can look for many terms in the initial search (500), and then the software automatically matches the terms to the main term and shows you which occurrence of the main term has the most matches. As many of you might know, I am a Bible codes proponent and not on the fence about the validity of the Bible code. A more advanced method I use is not to look for a list of initial search terms, but find a long main term that establishes a specific theme I want to develop. Only then do I begin to look for other terms in the matrix. If you accept that the Bible code is true, then once you develop a good and credible long main term (a sentence or more), you KNOW you will find the other terms there. Many of my recent matrixes have been developed using this method. However, for most people the better way is to look for a list of terms to find the matrix.

What is snooping? After we find a potential matrix using individual words as terms (as in the above matrix), then we look at the letters before and after the term to see if they are part of a longer sentence or phrase. Let's use "**rotze'ach**" in purple above, which is "murders" or as a present tense verb "he murders". The letters before and after are shown below:
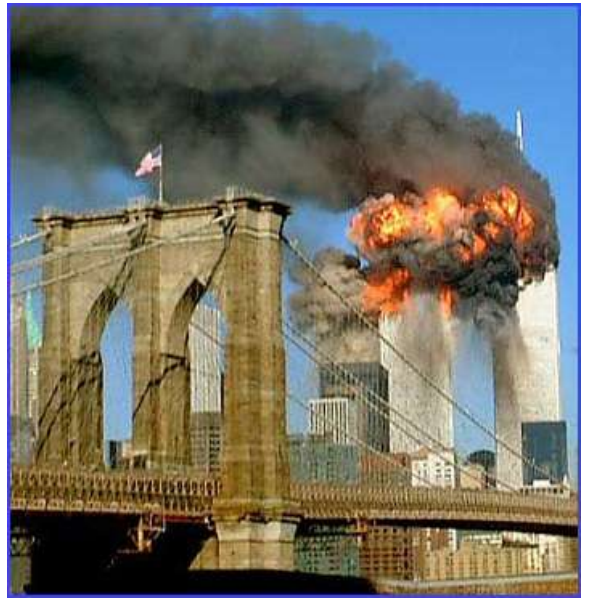

הכבבהבלבכחדרוצחדבמותרי

The method I use personally to quickly snoop a long term is to use a pad of paper, and copy the letters as a string on the top of the page. Then I use the printed Ben-Yehuda's Pocket Hebrew-English and English-Hebrew Dictionary to quickly look at word possibilities. For this string of letter, we get:

הכ בבה בלב כח רוצח

The term now reads, "**Strike the apple (of the eye)! He murders in the heart of power.**" Of course NYC is often called the "big apple". Secondly, the twin towers were the center of the most powerful financial district in the world; and therefore, the reference to the source of power is to financial power and not political power (which would be Washington D.C.).

In order to put together Hebrew sentences, one needs to learn Biblical Hebrew Grammar. Why? Because the Bible code is mainly Biblical Hebrew, and secondly, because Hebrew sentence forms are different than English. I show in another article, the books I recommend where anyone can do the Lessons and learn Biblical Hebrew Grammar at home. This is different than learning simple conversational Hebrew, which isn't very helpful in being able to understand and do longer terms in the Bible code.

Anatomy of an Attack

8:45 a.m.
First plane crashes into North Tower
American Airlines Flight 11

Departed Boston,
bound for Los Angeles

10:30 a.m. North Tower collapses

Facts about the World Trade Center
* For one year, the tallest building in the world
* Center has its own ZIP code
* Office spaces had no interior columns
* Occupancy rate was 98percent
* Each tower had 110 floors rising 1,353 feet
* Each tower had 21,800 windows
* The building had three vertical zones

GRAPHIC BY BRIAN CORDYACK—WASHINGTONPOST.COM

Let's look at another term from the Art Levitt matrix, "**pigu'a**" which is a horizontal term in the matrix meaning: a terrorist attack (Piel infinitive, gerund). The letters before and after "**pigu'a**" are:

כב ישאותלמופגנ ועפפעותלמ

As in the previous example, we try to develop these letters in a meaningful sentence that is on the topic of the theme of the 9-11 attack on the twin towers. To reiterate, I use a pad of paper to write down possibilities obtained by using the Ben-Yehuda's printed dictionary, and then it becomes more apparent when all possibilities are in front of you on paper. The longer term is:

יש אות למו פגוע

The longer term reads, "**There is a sign for them—a terror attack. Or, There is a sign for them of a terror attack.**" As you can see, all the letters I used were before (to the right of pigu'a), and I used no letters to the left of pigu'a. This is the simple essence of "snooping" to actually look and see if the short term initially found is part of a long sentence. This snooping method actually takes Bible code findings to a much higher level. The only downside is that one needs to learn Biblical Hebrew Grammar to do snooping well. Fortunately, an average or above average person can learn Biblical Hebrew Grammar at home in 6 months or so by doing 2 Lessons a week. For beginners, it is normal to begin doing Bible code searches knowing absolutely no Hebrew. You can learn as you go, and still begin finding matrixes using the #1 and #2 ranked codes software. First, begin by learning the Hebrew alphabet. Then you can begin learning Biblical Hebrew Grammar. Soon, you'll be doing cutting edge Bible code matrixes as well as anyone in the world.

The above matrix, as further developed, is extremely interesting visually. If you take the horizontal term in the middle of the page as the ground level at the twin towers in NYC, then the two long terms above it represent the twin towers as they stood before 9-11-2001. I guess one could take the portion of the center term in red above the horizontal term to be Tower 7 adjacent to the Twin Towers, which also was destroyed. The only term I could not develop further from Art's original simplistic matrix, was "Bin Laden" (Bin means son in Arabic). But...the fact that Bin Laden is there in the matrix parallel to all these other terms is significant. All the vertical terms in the matrix, taken together, are visually striking as parallel terms. The following page is the matrix report.

6

Term	Translation				
	Skip	R Factor	(in Matrix)	Start	End
ואלפי איש תפת רע	And thousands of people are at an evil place of burning. (twin towers in NYC)				
	3805	6.906	9.137	Genesis 47:29.1	Exodus 28:22.21
הכ בבה בלב כח רוצח	Strike the apple (of the eye)! He murders in the heart of power. (NYC)				
	3805	9.154	11.385	Genesis 24:47.54	Exodus 3:15.64
בינ לאדנ	Bin Laden				
	3805	-0.586	1.644	Exodus 3:15.54	Exodus 18:1.19
בז רוע נטויהו בשפטי מגדלים	A spoil of his stretching out of wickedness is in the punishments of the towers.				
	1	0.000	2.230	Exodus 6:6.73	Exodus 6:6.94
התאומים קלת	the twins thundered [the twin towers]				
	-3801	2.324	4.555	Exodus 15:11.20	Genesis 43:18.84
רמ פתיל אות צעה	A high one is a twisted sign, it bent over. [the tower]				
	-3805	5.780	8.010	Genesis 50:15.61	Genesis 26:24.18
עות העז בר זרח שמו	The power perverted a son, his name rises. [Bin Laden]				
	3805	9.811	12.042	Exodus 8:17.31	Exodus 39:10.38
יש אות למו פגוע	There is a sign for them -- a terror attack.				
	2	9.100	11.331	Genesis 45:21.10	Genesis 45:21.32
תרד ארהב הוי	The USA will come down, alas!				
	6	5.134	7.365	Genesis 39:16.27	Genesis 39:17.53
לעמ תמ כי את רשת ענג רתמו	For an innocent people, because they harnessed a delightful network. (internet)				
	3805	14.555	16.785	Exodus 3:15.50	Leviticus 7:18.26

The ELS reference is 3805 characters between rows (matrix ELS).
There are 10 displayed terms in the matrix.
The matrix starts at Genesis 24:47.22 and ends at Leviticus 7:18.63.
The matrix has 32 rows, is 56 columns wide and contains a total of 1792 characters.
The cumulative 'R' Factor for the displayed matrix is 82.253.

The matrix odds are 1 chance in 1.8 times 10 to the 82nd power.

REFLECTION

The main term "**And thousands are at an evil place of burning**" matches what took place at the Twin Towers on 9-11-2001. The word for "evil place of burning" in Hebrew is "tofet". Tofet was historically a valley on the south side of Jerusalem where the garbage was burnt, and also where the people worshiped the false god Molech. This is the place where the Bible says that the people caused their sons and daughters to pass through the fire to Molech. I have seen photographs of the smoke on 9-11 where it looked distinctly like the face of a demon in the smoke. The following two photographs show the face in the smoke with a light oval overlaid to show the viewer where to look. I should mention that with Photoshop, anyone can doctor a photograph easily, so I have no way of knowing whether or not what is shown was really in the picture or added by someone. However, these were already on the internet the day after 9-11.

There are original pictures on the internet without the light white oval placed there, so the face was not added with the white oval. If real, it is eery that the face of a demon appears in the smoke of the tower before it fell. However, the matrix term does say it was " an evil place of burning." The evil Muslim terrorists sacrificed themselves and the sons and daughters of America to their god Molech, causing all involved to pass through the fire.

The next term is "**Strike the apple (of the eye)! He murders in the heart of power.**" As I said, NYC is often called the Big Apple and the financial district in Manhattan is the center of financial power.

Clearly the matrix identifies "**Bin Laden**" as the person who brought about this attack on 9-11. This is in contradistinction to the "conspiracy theory" viewpoint being bandied about, that the USA government somehow planned and carried out 9-11 and blamed it on those poor Al Qaeda people in the mountains of Afghanistan. The Bible code matrix disagrees with the conspiracy view.

8

Following those terms, the next is "**A spoil of his stretching out of wickedness is in the punishments of the towers.**" This term is at an ELS of +1, but it is NOT straight out of the surface text. I used OTAWB (open text alternate word break) to rearrange the surface text letters into something different in meaning. Therefore, since it is an OTAWB and not surface text, it is a genuine ELS term. OTAWB is a repeatable phenomenon throughout the Bible code, but I just haven't made that public until now. Previously, only Walter York and I were doing it. The only difficult word there is the Qal participle "stretching out" with a 3ms object suffix, making it "his stretching out". Bin Laden stretched out his tentacles of Al Qaeda all the way from Afghanistan to NYC to carry out his wickedness and attack and bring down the Twin Towers on 9-11.

Next we have "**the twins thundered**". Notice that the ending mem of towers (migdolim) is the same mem used in "**the twins**"; a very nice affirmation of close proximity. This term modifies the one above in dark blue from "towers" in general, to mean "the twin towers". For those in lower Manhattan on 9-11, I understand that the Twin Towers did make a huge noise when they fell (they thundered).

The next term is "**A high one is a twisted sign, it bent over.**" You can see the twisting of the high one before it fell in the following picture.

"**The power perverted a son, his name rises**," is about Bin Laden. Bin means son in Arabic, and of course the name Bin Laden became a household word known throughout the world as a consequence of the 9-11 terrorist attack. The power of course came to Bin Laden over the past decade as he gained supporters, started terrorist training camps, gained financial backers, and carried out many terrorist acts throughout the world. This power perverted his thinking. Some might take issue with the use of the verb "he perverted" (eevet) which is the Piel 3ms perfect form of "avah" and shown in the printed Ben Yehuda's dictionary (page 229). But, since it is shown in the dictionary, it is valid.

Next is "**There is a sign for them—a terrorist attack.**" Of course the meaning and application to 9-11 is apparent to everyone without explanation. The 9-11 terrorist attack was a huge wakeup call or sign to the American people (and other nations) about the threat of international terrorism and Al Qaeda's network. On the other side, the 9-11 attack success was also a sign, to Muslim terrorists throughout the world, that they could achieve great success against even America.

The following term is "**The USA will come down, alas!**" To find it, I merely plugged in the abbreviation for USA and found it there in the matrix at an ELS of +6. It's significant that it is sort of a visual background banner behind the two towers sticking up in the matrix. I take it to mean that the USA will come down in stature as a result of being hit hard in the 9-11 terrorist attack. It showed that the USA is not invulnerable. Actually, when talking heads on the news shows state that the USA is the world's only superpower, it drives me up the wall. I know that Russia remains a military superpower in capability, and China should also be considered a superpower militarily and is fast becoming an economic superpower.

The last term is "**For an innocent people, because they harnessed a delightful network.**" The innocent people obviously refers to the average people in the USA, who never perceived a serious threat from terrorists until 9-11. However, it could also refer to average people all over the world, who woke up to find that Al Qaeda networks were already in place or operating through their own countries. The world also woke up to the fact of an extensive financial and operational network was already in place by Al Qaeda in many countries, harnessing the **internet** to coordinate their network..

I should mention that there are additional terms that I chose to not add to the matrix (vertical and diagonal), because I chose to keep the matrix visually simple with mainly vertical terms. It looks a lot less complicated that way. So don't assume that all possible terms are displayed. On the other hand, **the statistical odds of the matrix are 1 chance in 1.8 times 10 to the 82nd power.** All scientists use a working assumption that chance in the universe cannot exceed 10 to the 50th power, and a great many work with an even lower limit for chance in the universe of 10 to the 25th power (including Sagan, Gould and many others in their writings). Therefore, the reader ought not think this matrix to be fluff or inconsequential. The total matrix odds exceed all possibilities for chance occurrence in the universe. Compare this to the best matrix that a skeptic has done, a matrix by Dr. Brendan McKay. He claimed 1 chance in 10 million (10 to the 6th power), but a professional statistician and a professor both showed that Dr. McKay fluffed it up and that the real odds of McKay's matrix were ~1 chance in 10,000. All the matrixes I do now have sentences and exceed chance in the universe. Therefore, if the skeptics were real scientists they would acknowledge that they were completely wrong about the Bible code. As a trial lawyer might say, "I rest my case!"   **e-mail Roy A. Reinhold at: codes@ad2004.com**
